

WOOD BORING BITS

FEATURES

- Drills up to 600 holes without resharpening.
- Specifically designed for drilling large holes in rough wood applications with the speed, longevity and large size range that HVAC, plumbing and other contractors need.
- Hardened steel teeth provide a more solid surface for nail and knot impacts, extending the life of the teeth. Inset teeth lessen the outer diameter of the plug, increasing the chance the plug will fall out automatically for less cleanup and greater productivity.
- The recessed flat boring pilot bit (included) minimises contact with the plug, creating less friction.
