

THE TORCH™

The TORCH™ metal-cutting blades are designed to provide tough, straight cuts in all metal materials. Choose The TORCH™ blades when you need straight cuts in pipe or tube, or when you need greater tooth durability in hollow materials such as strut or conduit.

THE WRECKER™

The WRECKER™ multi-material blades are designed for true demolition work. Choose The Wrecker™ blades when you need tough cuts in nail-embedded wood, plaster and ferrous and non-ferrous metals.

THIN KERF - METAL

Thin Kerf metal-cutting blades are designed to provide fast, flexible cuts in all metal materials. Choose Thin Kerf blades when you need flexibility for flush cuts or scroll cuts, or when you want faster cuts in solid materials such as threaded rod or bar stock.

THIN KERF - MULTI-MATERIAL

Thin Kerf multi-material blades are designed to provide fast, flexible cuts in woods, plastics and metals.

ABLE TO HANDLE THE BROADEST SPECTRUM OF APPLICATIONS

FEATURES

- DOUBLE DUTY UPGRADE™: Improved tooth geometry allows for fast cuts and long life. Thick 1.06mm robust blade body and 25mm blade height improves stability and minimises vibration to allow for precise cuts. Bi-metal quality cutting teeth with 8% cobalt are the ultimate in performance and lifetime.
- TOUGH NECK™: Stamped indentations at the reception of The TORCH™ blade add strength to the tang and lessen the likelihood of breakage during use.
- GRID IRON™: Honeycomb pattern increases blade rigidity to resist blade buckling.

FEATURES

- Strong and precise: extra-thick 1.6mm blade body.
- Bi-metal construction: excellent blade life and performance.
- Tooth geometry: aggressive strengthened tooth tip design and uniform gullet depth allows for more material to be removed per stroke for faster cutting.
- The sloped blade shape makes this blade ideal for plunge cutting.
