

HOLE SAWS DIAMOND PLUS

- Greater durability and toughness delivers up to 10x longer life when cutting tile, stone and glass compared to standard bi-metal hole saws.
- A thicker, more rigid blade body resists fracturing and bending for maximum durability.
- The 1" tall blade body reduces blade twisting for straighter, more accurate cuts.

Ceramic tiles – all types hard and soft: porcelain, gres, granit, quarry, terrazzo, artificial stone, terracotta, agglomerate.

Cast iron.

Fibreglass / GRP (glass-reinforced plastic) / perspex.

The precisely controlled size and placement of the diamond grit allow these blades to cut up to 2x faster than standard carbide grit blades.

DIAMOND PLUS™ HOLE SAWS

FEATURES

- Higher grade diamonds provide greater heat resistance and fewer fractures, leading to a long life.
- Diamond grit edge drills and hole saws have been specifically developed for professionals that need to drill into extremely hard materials such as ceramic tiles (all types hard and soft: porcelain, gres, granite, quarry, artificial stone), cast iron and fibreglass/glass-reinforced plastic (perspex).
- Large slug ejection slot: offers easy plug removal.
