Evcco Smart Bend™ offers a unique approach to conduit bends through individual segments that “Snap-Lock” together. This concept allows bends to be assembled on site to provide various angles from 7.5 degrees to 90 degrees and beyond if necessary.

Smart-bend can be adjusted axially to provide compounded angles which are particularly important when connecting misaligned wall and floor penetrations.

Sizes range from;

40mm, 50mm, 63mm, 80mm, 100mm, 125mm & 150mm

Size	Radius
40mm	312mm
50mm	320mm
