URBAN

An innovative new range of switches and sockets, combining engineering excellence with sleek and modern design.

6.5mm*
profile

- > New Zealand engineered, researched and designed by Vynco's in-house team
- > Fully tested in New Zealand, to AS/NZS standards
- > Fit to any standard flush box, retrofittable in most homes
- > Cover plates available in white, black metal or can be custom painted to match your wall or splashback colours
- > 5 year warranty

Engineering

The Vynco engineering and design team has worked closely with local interior designers, architects and electrical contractors to develop this innovative range.

* the double horizontal with extra switch has an 8.5mm profile.

CUSTOM PAINTING

Enquire about custom painted Urban

Splashbacks complimenting the wall were an inspiration for our custom colour switches and powerpoints.

Cover plates are painted locally in New Zealand to match any paint colour.*

The ease of fitting the plates makes it simple to clip off and replace as trends and colour schemes change. Installing Urban helps future-proof your building project.

*Vynco endeavours to match paint colours as closely as possible but final colours may vary slightly from original colour swatches. Colour matching whites and creams is difficult, we suggest using Urban White.

FUSION

URBAN

The Evolution of Urban

How do you improve a great product?

Vynco's Fusion range has been installed in many homes, offices, and other buildings across New Zealand. However, we think it's time for an upgrade.

The research and development team here at Vynco looked at the key ways we could make this product more aesthetically pleasing for the end user and easier to install for the contractors.

The first big change was to reduce the visual depth of the switch and standard sockets to a mere 6.5mm.

To achieve this required the detailed design of the internal switch and socket components to reduce their size, while adjusting their position to make it easier to install and wire.

The final challenge was to ensure the new design, engineering details and materials meet the stringent performance and safety compliance requirements demanded of this range.

* the double horizontal with extra switch has an 8.5mm profile.

OR

TRADITIONAL DIMMERS USING MODERN PUSH BUTTON SWITCHES

OR

REMOVE TRADITIONAL DIMMERS AND OPT FOR MODERN PUSH BUTTON DIMMERS

MECH OPTIONS

MOTION SENSOR MECH WITH THE DIAZ STEP LIGHT

ALSO AVAILABLE IN SILVER & BLACK METAL!

ORDER PROCESS

HOW CAN I SEE THE PRODUCT?

Ask your local electrical contractor or wholesaler - Vynco Urban is stocked in both Christchurch and Auckland so it is easily accessed throughout the building process.

HOW TO ORDER CUSTOM COLOURED PLATES:

All products will be supplied with a white cover plate. This will ensure there are no delays in the building process. If not required, store your white cover plates for spares or replacement.

Discuss paint colours with your local paint shop, designer or architect, then specify the colours you require.

Download a Vynco Switchgear order form from www.vynco.co.nz or call Vynco on (09) 525 6051 or (03) 379 9283 to request an order form.

Present the completed form to your electrical contractor or wholesaler, who will forward an order to Vynco.

Delivery will be within 3 weeks of receipt of your order. If you have white cover plates fitted, simply clip off and replace with colour plates.

CLEANING

Cover plates can be polished with a soft cloth or glasses cleaning cloth. For more intense dirt, use a warm damp cloth.

NB: Do NOT use cleaning agents to clean Urban products.
