

Southern Cross[®] Spin-FX / TPU/ Scuff / EH | 812630

The Southern Cross[®] Spin-FX EH is a 150mm men's lace-up safety boot with a BOA[®] fit system and scuff cap.

Upper Materials

Nubuck (Wheat) and Full-grain (Black) cowhide water-resistant leather upper with double stitching in nylon thread. Features a scalloped, padded collar and tongue. Powered by the BOA[®] Fit System, the unique Spin-FX is designed to enhance performance and comfort. Made up of 49 strands of stainless steel (7 bundles of 7), braided together, injected and wrapped with nylon, the system is incredibly strong and durable.

Toe Cap

200J Steel Toe Cap

Lining Materials

This boot is lined with Spacer Mesh[®], which is a soft, non-abrasive, hydrophobic material that wicks perspiration away from the foot, enabling the skin to remain cool and dry.

Full Innersole

A full-length footbed is inserted into the footwear to provide additional support and comfort. This footbed is made from soft polyurethane, which will retain its shape and thickness throughout the life of the boot.

Insole

Heavy-duty, flexible, antibacterial, non-woven insole.

Midsole

Directly moulded polyurethane midsole for greater shock absorption.

Colours Available

- Wheat
- Black

Sizes Available

AUS Full Sizes: 5-14
AUS Half Sizes: 7⁵-11⁵

Outsole

Electrical Hazard Thermoplastic Polyurethane (TPU) Outsole for superior wear properties and heat resistant to 130°C.

Trisole[®] Comfort Technology

The Steel Blue soling system is a patented three-density soling system that provides a high level of comfort, shock absorbency, and energy return. The system uses PORON[®] as energy-absorbing pads placed under the pressure points of the foot to deliver superior comfort and offers shock absorbency comparable to that of sports footwear.

EH Series

Electric Shock Resistant: 18,000 volts at 60 Hz for 1 minute in dry conditions, with a leakage current of less than 1 milliamper. Meets the requirements of the American Standard ASTM F2413 Clause 5.6 - EH. Warning: Electrical shock resistance deteriorates rapidly in wet environments and with wear.

EH Series footwear is intended for use as secondary protective personal equipment. It should be used in conjunction with primary protective equipment in areas and environments where there is a need to reduce the risk of electric shock due to accidental contact with live electric wires.
