

## ELECTRICIANS TOOL BELTS

The CABAC Electricians Tool Belt range is built specifically for Aussie sparkies, whether you're working in commercial, industrial, domestic, or automotive settings.

Designed to include everything you need to get the job done - without the fluff that only adds cost and clutter—these belts are tailored to your trade, not someone else's.

The Large CABAC Electricians Tool Belt (Part No. **TB-LARGE**) is ideal for Commercial or Industrial Sparkies. It features a removable, heavy-duty belt that offers versatility: wear it on-site, or remove it and use the pouch as a hand-carried tool bag. This flexibility means you can carry gear across a job site, drop the pouch when you arrive, and work from it like a traditional tool bag.

The Small CABAC Electricians Tool Belt (Part No. **TB-SMALL**), on the other hand, is perfect for Domestic or Auto Sparkies. Lightweight and compact, it's a lifesaver when you're climbing through tight roof spaces or working off ladders. It holds just enough of your most-used tools - no more, no less - helping you avoid unnecessary strain on your hips from carrying extra gear.

Both belts are compatible with the **SB-SMALL** accessory pouch, keeping your tools organised and within reach at all times. And if you're using the Small Tool Belt but find yourself needing more room, the TB-LARGE has you covered.

Accessories not included
