Issue 2022-4

We've been with you since 1938...

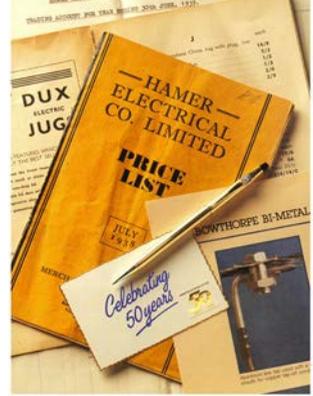

Hamer has a long history of trust within the New Zealand electrical industry. The company itself has evolved over the past 80 years but one thing is constant, our commitment to delivering quality products to our customers.

For the past 40 years we have been supplying the market with some of the best tools available, so it's safe to say we know quality when we see it.

Hamer's reputation for supplying quality products now extends to our own branded range, which includes a full complement of tools used everyday on sites around New Zealand.

Our range also features accessories such as bags, tape measures, spare blades and will continue to grow in the future.

These tools really are so good that we put our name on them.
