SCOUT® PRO MAX

The Klein Tools Scout® Pro Max tests and troubleshoots RJ11, RJ12, RJ45, and F-connector terminated cables and provides analog and digital tone generation for cable tracing. It measures cable lengths (via TDR) and detects distance to faults. Generate reports to show custom test history. Tests shielded and unshielded cables. Trace up to 20 locations at a time with included remotes. Perform hub blink testing, measure active and passive Power over Ethernet (PoE). Test POTS, and detect active network capabilities.

Professional Grade Tone Generator

Features analog and digital toning for accurate tracing (requires digital probe Cat. No. VDV500-223, sold separately)

Leads and Remotes Included

- RJ11 to RJ11 Cable (x2) 
- RJ12 to RJ12 Cable (x2) 
- RJ45 CAT6 to RJ45 CAT6 Cable (T658B) (x2) 
- Female Coax-F to Angled-Bed-of-Nails Cable 
- RJ45 LanMap™ Location ID Remotes (1-20) 
- F-Connector CoaxMap™ Location ID Remotes (1-20) 

- Voice (RJ11/RJ12) Wiremap/Testing/Length
- Data (RJ45) Wiremap/Testing/Length
- Analog Toning
- PoE (Power Over Ethernet) Testing
- Active Network Detection
- Coax Testing/Length
- POTS (Plain Old Telephone Service) Testing
- Digital Toning
- Hub Blink
- Test History Reporting
